## Skills

## Languages

## Summary

Graduated from the Department of Information Systems, I am motivated and experienced in programming and software development. I use my skills to create solutions, improve user experiences, and contribute to technological advancements. I am particularly interested in AI, automation, and emerging technologies to build efficient software solutions. I have experience working on diverse projects, including full-stack applications, database management, and API integrations, and I am always looking to apply new technologies to practical challenges.

## Experience

### IT Support at ACT College, Nabatiye

March 2020 - March 2021

A role in data collection, storage and management. Working on resolving technical issues inside the institution.

### Freelance Web Application Developer

April 2021 - June 2022

Developed and maintained web applications for clients, delivering responsive and user-friendly solutions. Handled API integrations, authentication, and cloud deployment across multiple projects, managing the full project lifecycle independently in remote and project-based settings.

### IT Support Specialist at Lancaster Plaza (Internship), Beirut

May 2021 - September 2021

During my internship, I served as an IT support Intern, where I gained hands-on experience in managing and troubleshooting networks and servers. I focused on ensuring the smooth operation of these systems, addressing any issues promptly and effectively. Additionally, I worked with data management, ensuring the integrity, security and efficient handling of data.

### Web Developer at Hyve online (Internship)

September 2021 - February 2022

During my internship, I was immersed in the field of Web Development. I was involved in the design, development, and maintenance of websites, focusing on both the aesthetic and functional aspects.

### Web Developer at Analytics Expertise, Beirut

April 2022 - Present

During my role, I am responsible for developing and maintaining advanced web applications, covering the full stack from frontend interfaces to backend services. This includes designing responsive user experiences, integrating secure authentication and authorization systems, implementing RESTful APIs, and managing databases for reliable data handling. I work with serverless and cloud-based deployments to ensure scalability and high availability, while focusing on both visual quality and technical robustness.
